

- Power supply: 220V AC / 50Hz * Can be ordered to work with different voltages
- Can work perfectly in conjunction with most existing Bell Ringing Installations
- Automatic internal Lubrication (Does not require regular access to the bell tower for oiling)
- The external protective shell is made entirely from INOX (stainless steel) making this mechanism ideal for installation in coastal regions or regions with harsh environment.
- Multiple installation options that allows manual ringing with clapper or installation on moving bells
